

Communities in connectivity space

The same 100×100 group-average matrix under two orderings. Reordering by community is a permutation only — no value changes — so the blocks on the right are structure in the data, not in the rendering.

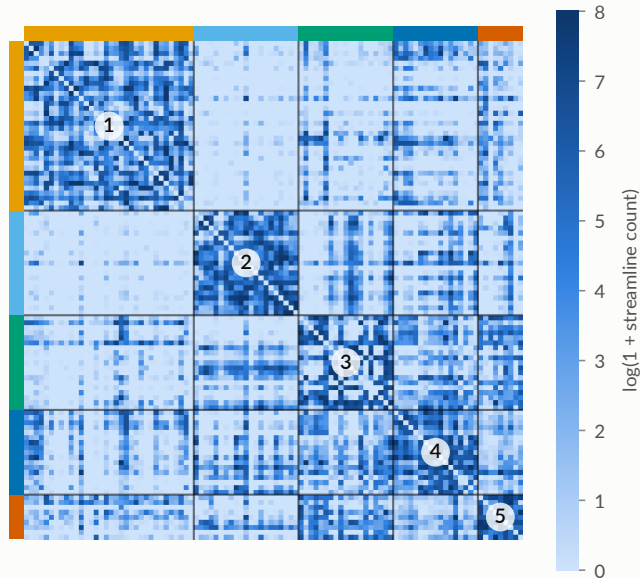

Schaefer atlas order

grouped by hemisphere, then network

Community order

same matrix, rows and columns permuted

Community (regions)

1 (34) 2 (21) 3 (19) 4 (17) 5 (9)

within-community mean 430 · between 43 · ratio 10.1×
